**✓** mhashmi373@gmail.com

**L** +1 (431) 338-6120

#### SKILLS

Languages: Python, Java, JavaScript/TypeScript, SQL, C/C++

Frameworks: React (Native), Next.js, Node.js, Express.js, Flask, SpringBoot, MongoDB, PostgreSQL, MSSQL

Tools: Git, Docker, Kubernetes, Azure, AWS, GitHub Actions, CI/CD, Maven, Jenkins, Jira

## Work Experience

#### Software Developer

Aug. 2024 - Present

Electric Mind — Python (Flask), TypeScript (React/Node.js), PostgreSQL, Docker, Azure, Figma

Toronto, ON

- Engineered an AI calling agent for automating fleet service appointments reducing the client's staff overhead by 35%.
- Researched and presented design-to-code tools from **Figma** to **React**, potentially cutting the company's POC-to-handoff time by **50%** and reducing dev resources by **25%**.
- Built and deployed an internal developer portal on top of **Backstage by Spotify**, including software catalogs, templates, and plugins, accelerating the company's developer onboarding process by **2x**.

#### Software Developer Co-op

Jan. 2023 – Apr. 2023

Royal Bank of Canada — Java, SpringBoot, Maven, Jenkins, JIRA

Toronto, ON

- Enhanced existing SpringBoot APIs powering mainframe verification and transactions at over 4000 RBC ATMs.
- Resolved 22 critical security vulnerabilities in the codebase caused by Maven dependencies, twice as fast as estimated.
- Performed successful migration of legacy SpringBoot applications from Java 8 to Java 17 by rewriting incompatible code components into new syntax and updating sub-dependencies.

#### Software Engineer Co-op/Part-Time

Jan. 2022 – Dec. 2022

University Health Network — Python, MSSQL, ReactJS, PHP, LaTeX

Toronto, ON

- Developed an automated **ETL** pipeline to transform custom clinical survey results into a normalized data model in **pandas** to enable standard data visualization practices.
- · Proactively increased the team's productivity by writing reusable scripts for generating clinical result reports.
- · Commended by the team's manager for exceeding expectations and invited back as a part-time Python developer.

## RELEVANT EXPERIENCE

# • Langchain Open Source Contribution — Python

Sep. 2023 - Dec. 2023

Popular LLM Library with over 88K stars

- Expanded language support in Langchain within the LanguageParser module to enable Retrieval Augmented Generation (RAG) with source code files in 12 programming languages.
- Pull request reviewed and accepted within 2 months and merged into version 0.1.17.

• Scholarly — Next.js, Node.js, PostgreSQL, TypeScript, Docker, AWS Lightsail

Jan. 2023 – Apr. 2023

Real-time online tutoring application powered by WebRTC

- Architectured real-time video chat using WebRTC for low-latency communication between students and tutors.
- Implemented a production-ready **Stripe** payment system with asynchronous processing via **webhooks**.
- Deployed the application using **Docker** and **Amazon Lightsail**, with **LetsEncrypt** TLS certificates.

• Weast — Python, SQLite, AWS, Papertail, OpenAI

Jun. 2021 – Present

ChatGPT Discord bot with over 500 active users

- Integrated a chatbot command using the GPT API conversational queries resulting a 30% increase in user interaction.
- Streamlined deployment by serving the project over an AWS EC2 server using Docker containers and setup CI/CD using GitHub Actions, resulting in a seamless experience for users.

#### EDUCATION

### University of Toronto - Honors Bachelor's of Science

Sep. 2020 – Jun. 2024

Major in Computer Science — Specialization in Software Engineering Stream

Toronto, ON

• Teaching Assistant – CSCC09, CSCC01, CSCB07, MATA32, MATA33, MATA34, MATA36 Conducted weekly tutorial sessions with over 30 students covering concepts in software engineering, object oriented programming and web development using Java, ReactJS, Node.js, etc.
