SKILLS

Languages: Python, Java, JavaScript/TypeScript, C, SQL

Frameworks: Angular, React / React Native, SpringBoot, Django, Next.js, Node.js, Express.js, Flask

Data/Databases: PostgreSQL, MySQL, MSSQL, SQLite, MongoDB, Elasticsearch, Databricks

Cloud/DevOps: Kubernetes, Azure, AWS, GCP, OpenShift, Terraform, GitHub Actions

Dev Tools: Git, Docker, Maven, Jira

WORK EXPERIENCE

Electric Mind — Business & Technology Consulting

Toronto, ON

Software Developer II

Jan. 2026 – Present

Software Developer I

Aug. 2024 – Dec. 2025

- **RBC Investor Services** — *Angular, SpringBoot, Elasticsearch*
 - * Designed and implemented a **microfrontend** architecture using **single-spa** framework for a navigation modernization initiative, enabling independent deployments with a multi-bundle build setup; adopted across the platform.
 - * Diagnosed and fixed a release-blocking concurrency bug caused by thread-unsafe session state in the **SpringBoot** backend, and stabilizing client launch.
 - * Drove a **97%** reduction in initial page load time (**20s** → **600ms**) by identifying and eliminating excessive **JavaScript/CSS** bundle bloat caused by repeated global style imports in **Angular** components; solution was shared across teams and adopted to optimize other platform micro-apps.
- **Gore Mutual** — *Django, SQL, Azure, Databricks*
 - * Contributed to the architecture design and implementation for a **Databricks** → **MySQL ETL** pipeline handling over **10,000** records in a **Django** application, including automated data cleansing and transformation workflows.
 - * Implemented complex admin-facing UI features such as hierarchical views, search, and pagination, and collaborated with the design team to propose a performant UX that was approved by the product owner.
- **IMCO** — *Liquibase, Azure DevOps, SparkSQL*
 - * Led the implementation of an automated schema deployment framework optimizing database migrations and improving the client's deployment efficiency by **20-30%**.
 - * Collaborated with clients' **QA/DevOps** teams to align the framework with their critical pain points, leading to eventual adoption and received positive feedback during multiple demos.

Royal Bank of Canada

Toronto, ON

Software Developer Co-op — *Java, SpringBoot, Maven, Jenkins*

Jan. 2023 – Apr. 2023

- Enhanced existing **SpringBoot** APIs powering mainframe verification and transactions at over **4000** RBC ATMs.
- Resolved **22** critical security vulnerabilities in the codebase caused by **Maven** dependencies, twice as fast as estimated.
- Performed successful migration of legacy **SpringBoot** applications from **Java 8** to **Java 17** by rewriting incompatible code components into new syntax and updating sub-dependencies.

University Health Network

Toronto, ON

Software Engineer Co-op/Part-Time — *Python, MSSQL, React, PHP, LaTeX*

Jan. 2022 – Dec. 2022

- Developed an automated **ETL** pipeline in **Python** and **pandas** that saved **10+** research hours weekly by transforming custom clinical surveys into a normalized data model for faster visualization.
- Increased team productivity by developing reusable **Python** scripts that automated the generation of clinical result reports.

PROJECTS

🔗 Langchain Open Source Contribution

Sep. 2023 - Dec. 2023

Popular LLM Library with over **88K** stars — *Python*

- Expanded language support in **Langchain** within the **LanguageParser** module to enable **Retrieval Augmented Generation (RAG)** with source code files in **12** programming languages.
- Pull request reviewed and accepted within **2** months and merged into version **0.1.17**.

EDUCATION

University of Toronto - Honors Bachelor's of Science

Sep. 2020 – Jun. 2024

Major in Computer Science — *Specialization in Software Engineering Stream*

Toronto, ON

- **Teaching Assistant** – *CSCC09, CSCC01, CSCB07, MATA32, MATA33, MATA34, MATA36*
Mentored **30+** students weekly in core Computer Science concepts including **software engineering** and **web development**, improving their understanding of **Java**, **JavaScript**, and more.
